

Data sheet safety information

Reusable detectable quick ties

| Dimension (L x W) | Product code | Tensile strength [N] |
|-------------------|--------------|----------------------|
| 120 x 3.5 mm | P0453-2 | 130 |
| 180 x 3.5 mm | P0454-2 | 150 |
| 240 x 3.9 mm | P0455-2 | 180 |
| 320 x 4.4 mm | P0456-2 | 230 |

Material : Polyethylene with metallic fillers

Flammability: According to FDA

Colour: Blue

REGULATORY INFORMATION

EU Regulations

Declaration of Conformity in accordance with Regulation EU No 10/2011:

Compound meets the applicable requirements of the Framework Regulation EC No 1935/2004 on materials and articles intended to come into contact with food and of the Council Regulation (EC) No 2023/2006 on good manufacturing practice (GMP).

The raw material used meets the applicable requirements set for the monomers and the other substances (additives, polymer production aids, colorants etc.) according to Regulation EU No 10/2011.

FDA (American Food and Drug Administration):

Food contact according to the U.S. Food and Drug Administration (FDA):

According to the manufacturer's data, the base polymer meets the requirements for repeated contact with food according to FDA 21 CFR 177.1520 (a)(2) and (c) 2.1, 2.2 (Olefinpolymers).

According to the manufacturer's data, the base polymer meets the requirements of the paragraph under the conditions A through H to FDA 21 CFR 176.170(c), table 2 and can be used with all type of food to table 1 of 21 CFR 176.170 (c).

There are requirements regarding extractive limitations as specified in FDA § 21 CFR 177.1520. Adherence to these requirements has not been tested on the compound since they are usually referring to the final article.

As to the manufacturer's data, the other additives meet the requirements for repeated contact with food according to FDA

§ 21 CFR 178.3297 (Colorants for polymers).

PROHACCP Company informs that our metal detectable products have magnetic characteristics and can be detected by standard metal detection systems. However due to settings of different metal detection systems, PROHACCP Sp. z o. o. cannot guarantee that our products will be detected by your metal detectors. Therefore we cannot take responsibility for any non-detection of our products or their parts. Detectability of our products depends on metal detector settings, and type of food products produced (product composition, size, humidity etc). In order to make sure that our metal detectable products will be detected we strongly recommend that you test it on your metal detectors before you use it.

On behalf of PROHACCP Sp. z o. o.
